Mr. Ghassan Lahham

Founder and CEO of Electronic Health Solutions International (EHSI), Jordan

Email: ghassan@ehs-int.com

Mr. Al-Lahham is a well-known expert in the use of automation in the public education and healthcare sectors. He has been recognized for his entrepreneurial accomplishments in achieving significant milestones in his career. His main asset is combining the experience of a private sector entrepreneur, with his leadership of automation in world-class education and healthcare. He presents balanced and pragmatic perspectives from both the private and public sectors. Ghassan has been directly managing a number of projects that have rapid and long-term impact on the development of healthcare and education sectors in Jordan and the local region. In addition, he managed Jordan's biggest and most strategic IT project "Hakeem", which is responsible for the automation of the healthcare sector covering all public, military, and cancer centers countrywide

Jordan Healthcare Digital Transformation...

How we did it?

Challenges Facing the Health Sector

Patient Safety

Bureaucracy

Paper Work

Process Efficiency

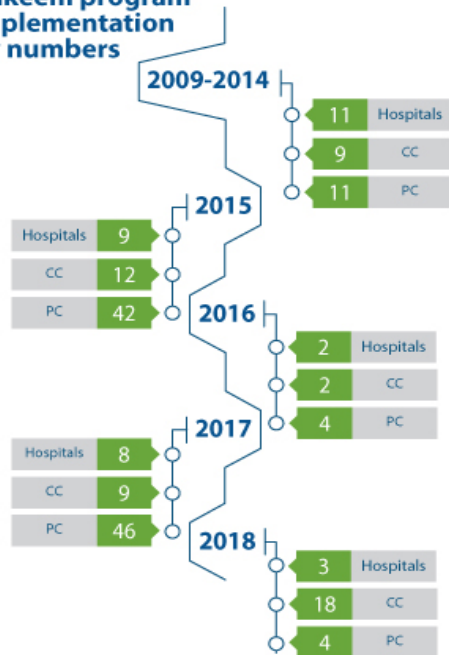

Waste of medications,
lab tests and radiology films

The dream

- Electronic medical record for each citizen
- Physician flexibility to help patients from any location
- Digital data to enhance public health
- Analytics based on big data
- High quality affordable diagnosis and treatments

Dream Realization

Hakeem program implementation by numbers

#Hospitals

Completed Projects
190

* In addition to 9 health directorates under the ministry of health

Note: This map has been updated on December 2018

- Success record in 190 sites.
- Above 6,5 Million Registered Patients

Laying the foundation

- Political buy-in
- Standardization of coding
- Solid infrastructure
- Choosing the best fit solution
- Execute...Execute...Execute...

Electronic Health Solutions International (EHSI)

EHSI is a health care IT company that focuses on the Middle East healthcare market. Headquartered in Amman and dedicated to helping healthcare organizations improve the quality of healthcare; through the use of highly effective technologies.

Our Initiatives

2009

Aims to automate the public healthcare sector in Jordan by implanting electronic health record (EHR), offering a single record per patient nationwide that can be accessed through patient's ID number.

2013

The Electronic library of medicine provides healthcare professionals in Jordan with the latest evidence-based medical resources for free.

Electronic Health Solutions International
شركة حلول الصحة الإلكترونية

Aims to support researchers and decision makers in Jordan by extracting integrated and comprehensive data using business intelligence tools and solutions as well as analytical expertise.

Build local capacity and aims to develop healthcare professionals, university students, and EHS employees in the fields of health informatics and information technology.

2019

2015

Why EHSI?

- Open source technology

- A blend of local and international experts combining the international standards and local awareness

- A specialized team of over 450 experts

- A 24/7 service center for the region.

Hakeem Program

Launched in 2009, under the patronage of His Majesty King Abdullah II.

Hakeem program represents the first initiative of the company for computerizing the Kingdom's health sector.

Hakeem program aims to deploy **EHR** in Jordan's health sector civil and military hospitals and clinics.

Hakeem Program in four easy steps

How does 'Hakeem' program work

Obtaining proper healthcare

According to the physician's instructions entered in your electronic health record, you will receive the required medical services from the laboratory or radiology departments. All test results and images will be sent to the doctor electronically without the need for the patient to pick them up personally. Also, your prescription will also be sent electronically to the pharmacy to be ready for pick up.

4 STEP FOUR:

Obtaining your Electronic Health Record (EHR)

The medical records department enters your personal information into the Hakeem program using your national ID number.

1 STEP ONE:

How to book your medical appointment

The medical records department will set an appointment electronically for your physician visit. This step saves you time and effort by providing you with the specific date and time of your next physician visit, as well as helping the doctors to easily track down their daily appointments and provide basic patient information

2 STEP TWO:

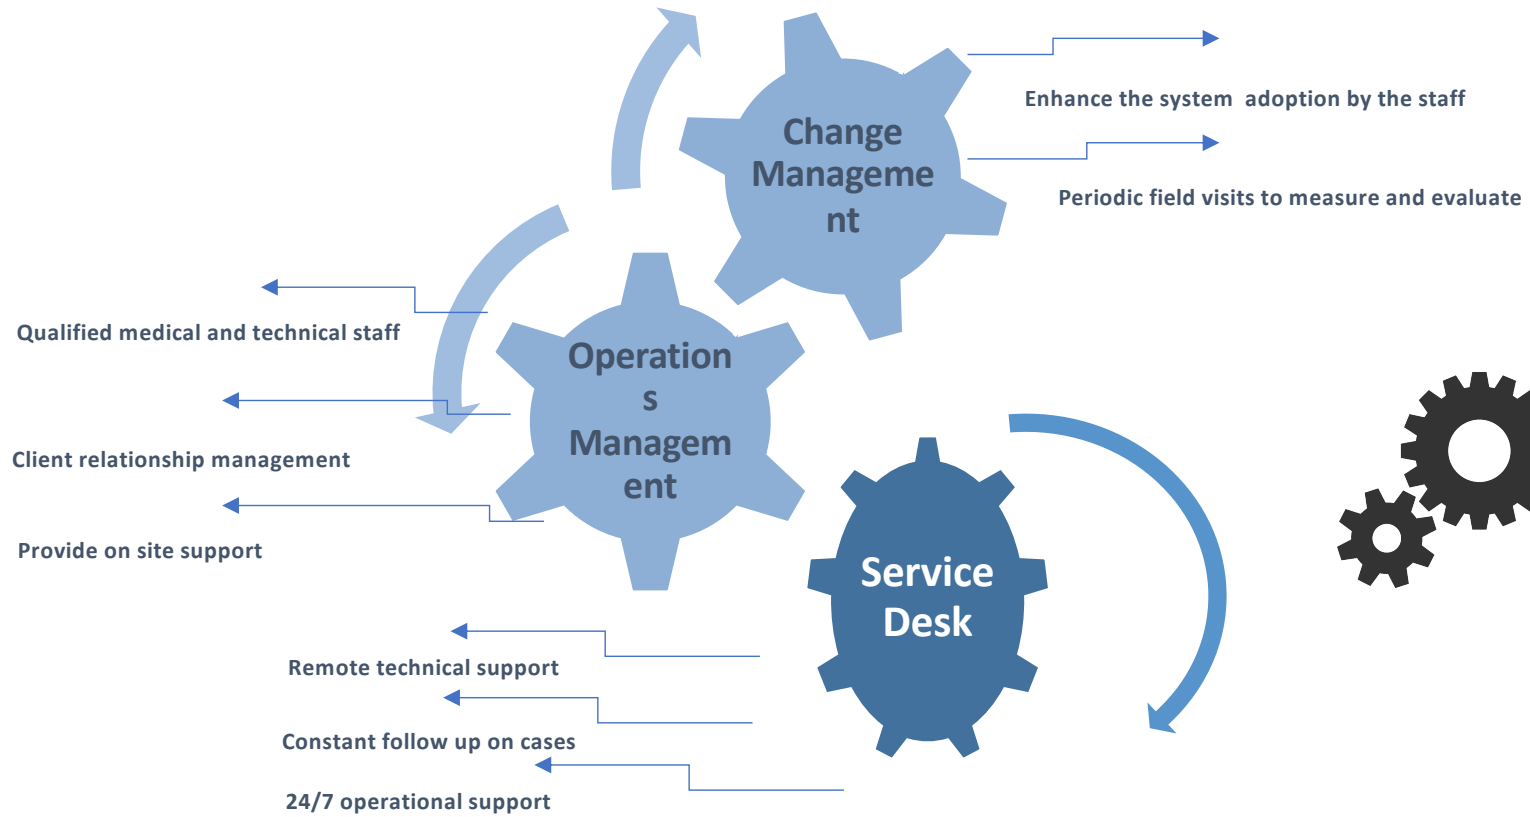

When at the doctor's clinic

The physician will do the necessary check-ups and directly enters your medical information into the Hakeem program, this information will be saved for future reference and can be pulled out from the system by an authorized personnel from any hospital or clinic which implements the Hakeem program within the same entity. This is an automatic and paperless process. (Entities: MoH, RMS, KHCC)

3 STEP THREE:

Business continuity and support

USTDA study

A study was conducted by U.S. Trade and Development Agency's study for medical expenditures to assess the impact of implementing Hakeem in the pilot sites in Jordan after 6 months of the implementation (Y2011- Y2012) :

- Medication savings: 24 %
- Radiology Films :
 - ✓ The Value of Saving in CT Scan films : 86 %
 - ✓ The Value of Saving in x-ray films : 98 %
 - ✓ The Value of Saving in MRI films : 91 %

Benefits of Hakeem program

Reduce operating costs

- Assist in controlling lab tests, x-rays and drug duplication.
- Improving resources utilization in dispensing drugs

Support research and decision making

- Support the decision-making process, by providing necessary and periodic statistics
- Assist in providing necessary policies for the advancement of healthcare in Jordan
- Create a comprehensive database of Patients

Positive patient experience

- Health institutions workflow optimization
- Link the patient's health medical information electronically to a database exchange
- Enabling electronic referrals between facilities

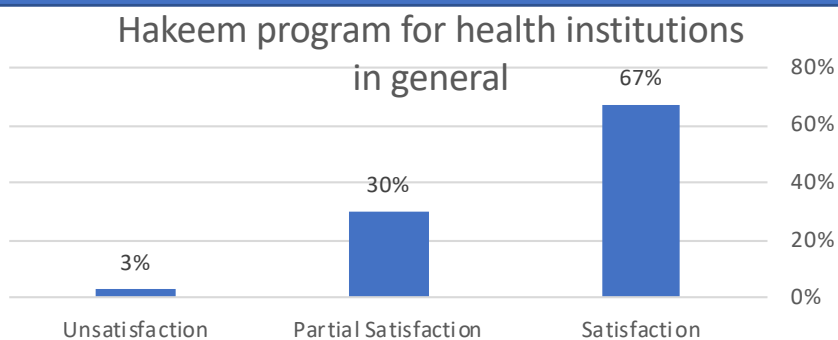

Improving healthcare services and reduction in medical errors

- Enabling doctors to review the patient's full health record
- Improve patient safety (BCMA, drug-drug interaction, allergies alerts)
- Clinical reminders and Activation of preventive health care program

2016 study Included 2865 patients and 2250 end users in 20 sites

End User sample survey

Ease of retrieving radiology images

Patients sample survey

Patient satisfaction according to division

Medication expenditure accuracy

About VistA

- VistA has benefited from more than 30 years of continuous, clinician-driven improvement.
- VistA serves nearly 9 million Veterans as part of the largest healthcare system in the United States.
- VistA serves more than 1,800 hospitals and other healthcare providers around the world.

About VistA

- A comprehensive system for managing both large and small healthcare facilities, providing functions ranging from prescription refills to employee timekeeping.
- The New York State Office of Mental Health has chosen VistA system throughout its 24-hospital- 310-clinic healthcare system that provides mental health services to 700,000 people a year.
- West Virginia (WV) Department of Health & Human Resources (DHHR) has chosen VistA system throughout its 7 healthcare facilities through the Bureau for Behavior Health & Health Facilities (BHFF).

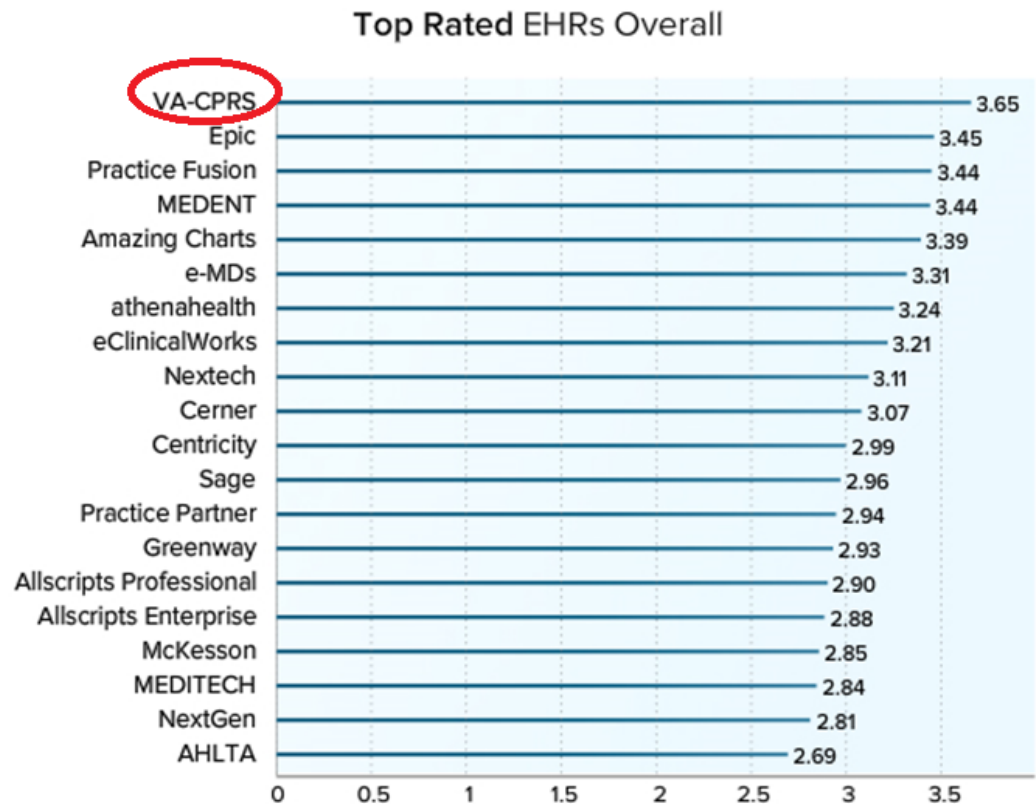

Why VistA is the choice?

- VistA is compliant with international standards including: HIPAA, CCHIT and Meaningful use.
- A 2011 survey conducted by the American Academy of Family Physicians ranked VistA's primary user interface in the top 10 for user satisfaction, and first in several other categories.
- Medscape EHR reports from both 2014 and 2016 rank the VA's computerized record system number one with physicians and in its usefulness as a clinical tool.
