

# Electricité du Liban (EDL) in Numbers

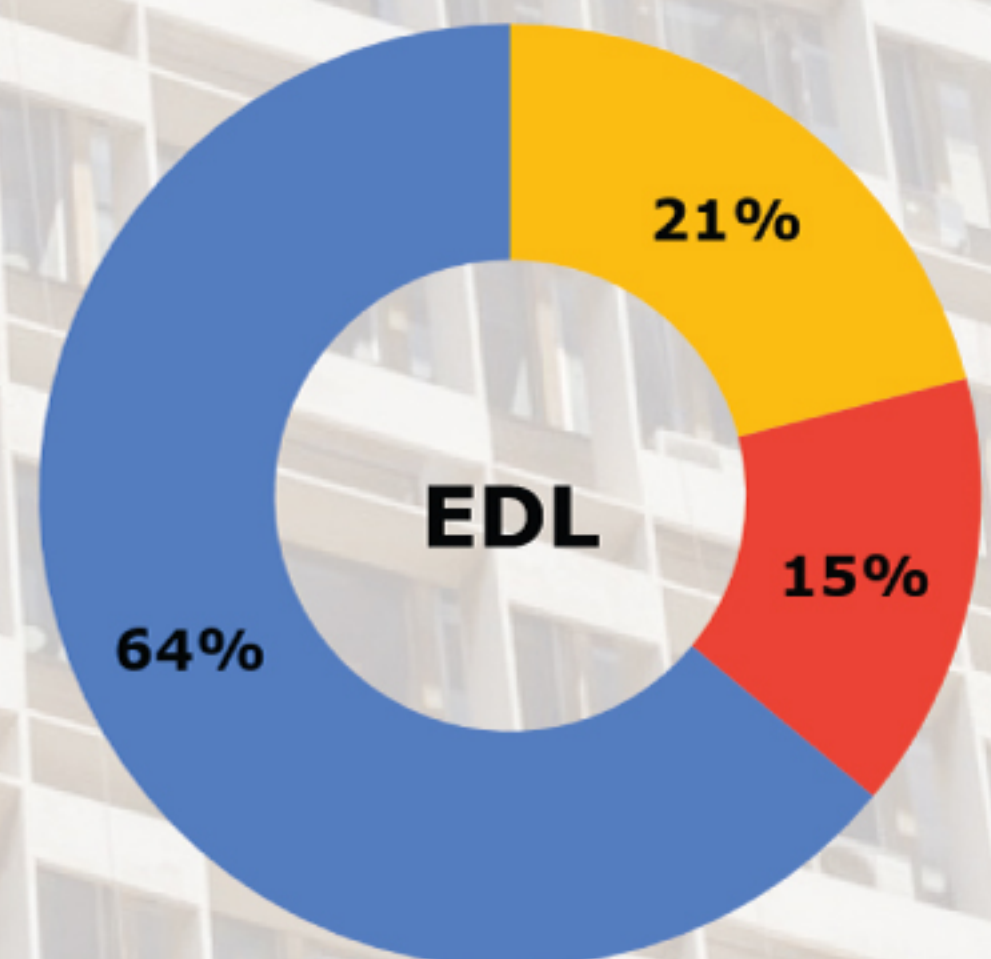

**EDL is the most unprofitable utility in the region**

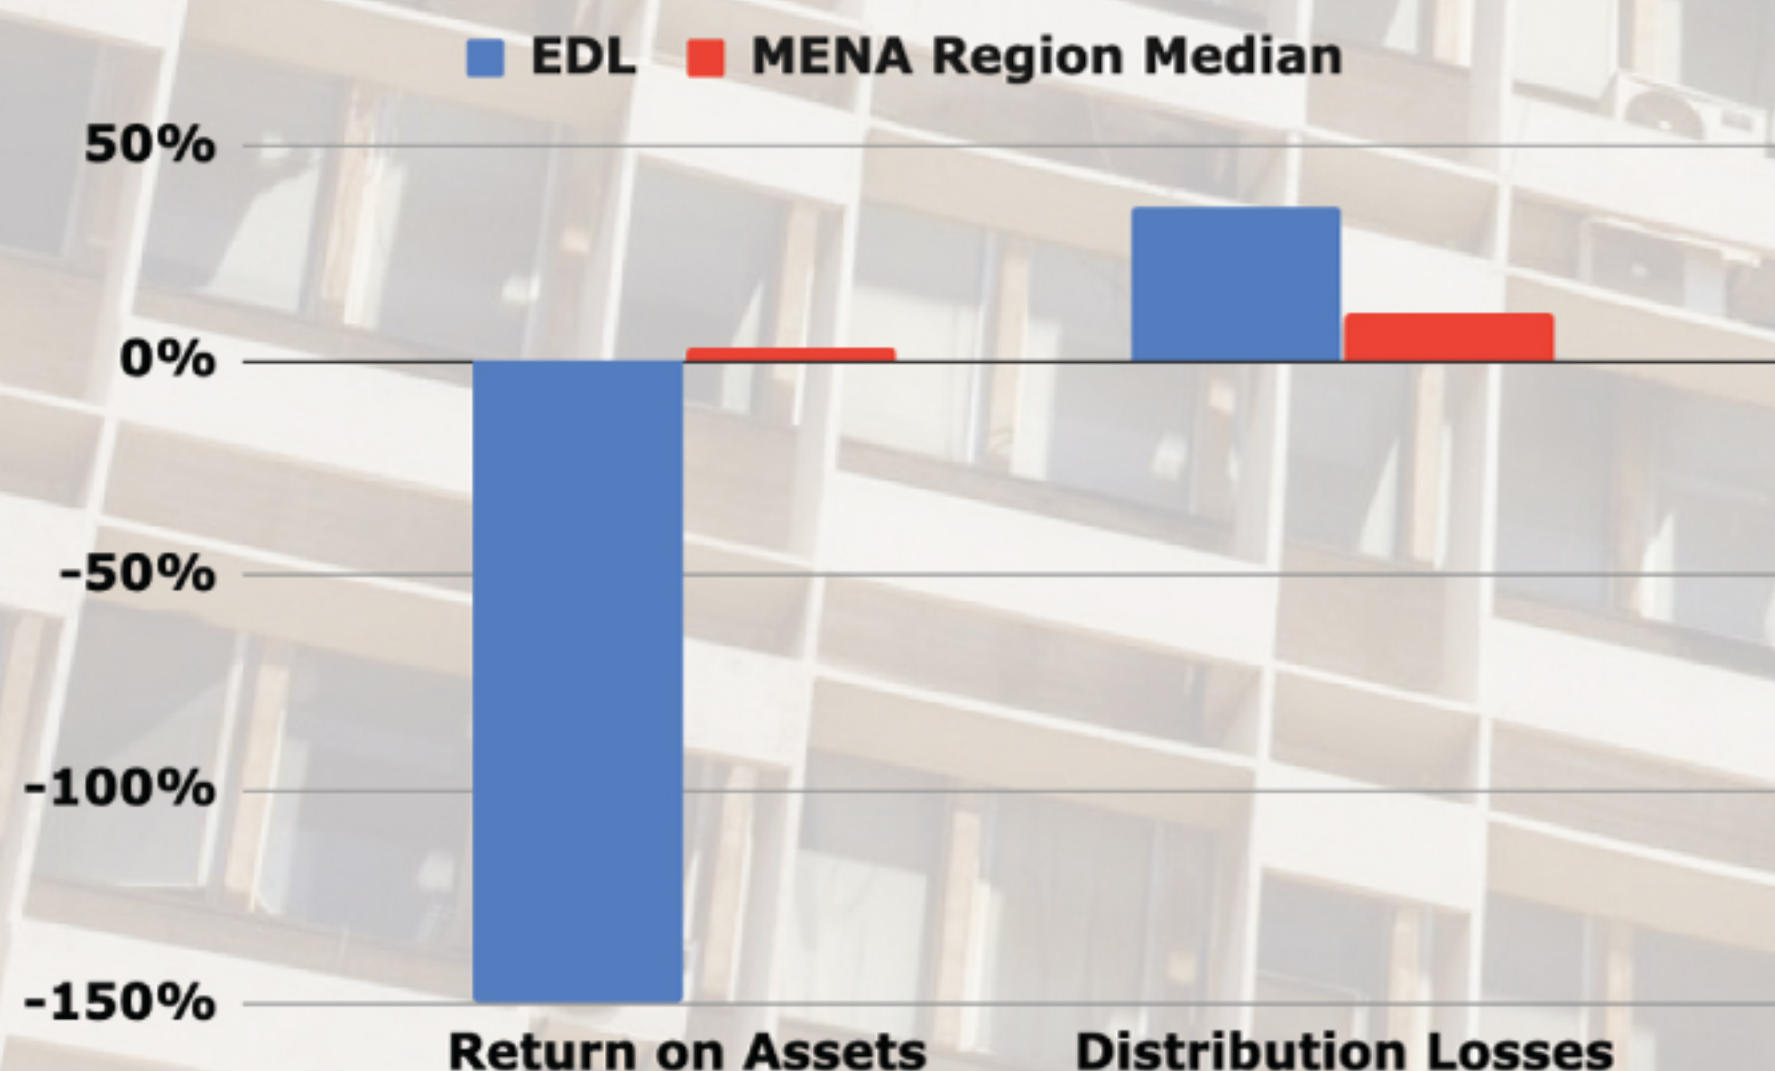

**With a very low cost-recovery, EDL is a loss making public utility**

**High losses increase the cost of supply by at least 6 cents per kWh**

■ Non-Technical Losses ■ Technical Losses ■ Bills

**Compared to other vertically-integrated utilities in the MENA region, EDL is the second most costly utility to run with operational costs way above the regional median**
